

DIVYAM SUDHAKAR CHAUDHARI

Software Engineer in Test (SDET) • ISTQB CTFL v4.0 Certified • AI-Powered QA

Pune, India • +91-9511623290 • divyamschaudhari@gmail.com • [linkedin.com/in/divyamchaudhari](https://www.linkedin.com/in/divyamchaudhari) • github.com/divyam-c

PROFESSIONAL SUMMARY

ISTQB CTFL v4.0 certified SDET with 2+ years of experience delivering quality across manual, automation, and API testing for web applications. Known for combining structured testing practices with a practical AI-first mindset including building AI-powered QA tooling that measurably improved team efficiency. Hands-on with Selenium WebDriver, Java, TestNG, and Postman in Agile environments; currently expanding into modern end-to-end automation with Playwright and JavaScript. Passionate about making QA proactive rather than reactive, and continuously upskilling at the intersection of testing and emerging technology.

PROFESSIONAL EXPERIENCE

Software Quality Engineer | Cytel Statistical Software & Services Pvt. Ltd., Pune

Feb 2025 – Present

- ▶ Built an AI-powered test case generation agent using ROVO (JIRA AI) that auto-generates structured, requirement-linked test scenarios reducing test design effort by ~40% and improving coverage standardization across the team.
- ▶ Initiated development of a Playwright (JavaScript) automation framework using an AI-agentic approach, with planned integration into CI/CD pipelines via GitHub Actions.
- ▶ Designed and executed 150+ functional, integration, regression, and API test cases for statistical web applications, achieving zero critical post-release defects across 5+ production releases.
- ▶ Validated REST APIs using Postman, verifying request/response integrity, error handling, and data accuracy across endpoints.
- ▶ Logged and managed 40+ defects in JIRA with detailed root-cause analysis, collaborating with developers to reduce average resolution time by ~25%.
- ▶ Participated in Agile ceremonies including sprint planning, defect triage, and daily standups; authored release sign-off documentation.

QA Analyst Intern | Telosa Services Private Limited, Pune

Aug 2024 – Jan 2025

- ▶ Derived 80+ test scenarios from SRS documents and executed functional and regression testing across multiple application modules.
- ▶ Reported and tracked 30+ defects in JIRA with complete reproduction steps, ensuring traceability throughout the defect lifecycle.
- ▶ Developed a Selenium + Java automation Proof of Concept (POC) within a pre-built framework, validating its feasibility for future adoption.

QA Associate Consultant | Innovatus Engineering Solutions, Mumbai

Jul 2023 – Aug 2024

- ▶ Provided QA consulting support for web-based business applications, contributing to functional, regression, and exploratory testing activities.
- ▶ Created 100+ test cases and a Requirements Traceability Matrix (RTM) to ensure coverage alignment with functional requirements.
- ▶ Tracked defects and supported UAT activities across Agile sprints, coordinating with stakeholders during pre-release validation.
- ▶ Performed API verification using Postman and assisted with test documentation and sign-off for client deliverables.

KEY PROJECTS

TestGenie AI – AI-Powered Test Case Generator | *Next.js · React · OpenRouter API · Tailwind CSS*

- ▶ Built a full-stack AI application that generates structured QA test cases directly from product requirements using LLM integration.
- ▶ Live at: testgenie-ai.vercel.app — demonstrates initiative in applying AI to real QA workflows.

Tricentis Vehicle Insurance – Automation | *Selenium WebDriver · Java · TestNG · Maven · Page Object Model*

- ▶ Automated 50+ end-to-end test cases achieving ~75% regression coverage; implemented parallel execution and HTML reporting via TestNG.
- ▶ Structured automation using Page Object Model (POM) for maintainability and reusability across browsers.

OpenCart – Functional & API Testing | *Postman · REST API · SQL · JIRA*

- ▶ Executed functional and regression testing for core e-commerce workflows (cart, checkout, user management); validated 20+ REST endpoints using Postman.

OrangeHRM – Manual Testing | *JIRA · TestRail*

- Designed 60+ test scenarios across Login, User Management, and Leave modules; logged 15+ defects with severity classification in JIRA.

TECHNICAL SKILLS

Test Automation	Selenium WebDriver, TestNG, Cucumber (BDD), Page Object Model (POM), Maven, Playwright with JavaScript (in progress)
API Testing	Postman, REST API Testing, JSON Validation, API Integration Testing
Languages	Java, OOP Concepts, JavaScript (currently building automation skills with Playwright)
Testing Types	Functional, Regression, Integration, Smoke, Exploratory, UAT, End-to-End, API Testing
Tools & Platforms	JIRA, TestRail, Git, GitHub Copilot, ROVO (JIRA AI), Eclipse, VS Code
Methodologies	Agile/Scrum, SDLC, STLC, Defect Lifecycle Management, Test Planning, Root Cause Analysis

EDUCATION

Bachelor of Engineering	2020 – 2023
Savitribai Phule Pune University (SPPU) • CGPA: 8.7/10	
Diploma in Engineering	2017 – 2020
Maharashtra State Board of Technical Education (MSBTE) • 92.77%	

CERTIFICATIONS

- ISTQB® Certified Tester – Foundation Level (CTFL v4.0) | **UK & Ireland Testing Board, 2026**
- Software Development Engineer in Test (SDET) – A+ Grade | **SEED INFOTECH Pvt. Ltd., 2025**
- AI for Software Testers: Apply AI Tools and Techniques to the STLC | **LinkedIn Learning, 2025**
- The Complete 2024 Software Testing Bootcamp | **Udemy, 2025**
